SUMMARY SECTION

Pacer US Small Cap Cash Cows Growth Leaders ETF

Investment Objective

The Pacer US Small Cap Cash Cows Growth Leaders ETF (the “Fund”) is an exchange traded fund (“ETF”) that seeks to track the performance, before fees and expenses, of the Pacer US Small Cap Cash Cows Growth Leaders Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

| | |
|---|--------------|
| Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment) | |
| Management Fees | 0.59% |
| Distribution and/or Service (12b-1) Fees | None |
| Other Expenses* | 0.00% |
| Total Annual Fund Operating Expenses | 0.59% |

* Estimated for the current fiscal year

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the Shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

| | |
|----------------------|-----------------------|
| <u>1 Year</u> | <u>3 Years</u> |
| \$60 | \$189 |

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” (or indexing) investment approach designed to track the total return performance, before fees and expenses, of the Index. The Index is based on a proprietary methodology developed and maintained by Index Design Group (the “Index Provider”), an affiliate of Pacer Advisors, Inc., the Fund’s investment adviser (the “Adviser”).

The Index

The Index uses a rules-based methodology that seeks to provide exposure to small-capitalization U.S. companies with above average free cash flow margins. Companies with above average free cash flow margins are commonly referred to as “cash cows.” The Fund considers a company to be a small-capitalization at the time of purchase if it was included in the S&P SmallCap 600[®] Index (the “S&P SmallCap 600”) at any time within the prior six months.

The initial Index universe is derived from the component companies of the S&P SmallCap 600. The initial universe of companies is screened based on their average projected free cash flows and earnings (if available) over each of the next two fiscal years. Companies for which information on their projected free cash flows or earnings is not available will remain in the Index universe. A company’s projected free cash flows and earnings are determined by the Index Provider. Companies with negative average projected free cash flows or earnings are removed from the Index universe. Additionally, companies in the financial or real estate sectors are excluded from the Index universe.

Free Cash Flow (FCF): A company’s cash flow from operations minus capital expenditures.

Sales: The value of what a company sold to its customers during a given period; also known as revenue.

Free Cash Flow Margin: FCF / Sales

The remaining companies are ranked by their free cash flow margin (defined as a company’s free cash flow divided by sales) for the trailing twelve month period. The equity securities of the 100 companies with the highest free cash flow margin are included in the Index. Companies included in the Index are weighted by their price momentum score and a company’s price momentum score is calculated on each of the reconstitution dates. The effect of the price momentum score is to overweight companies with relative positive price momentum, while underweighting companies with relative negative price momentum over a period of approximately the prior six months.

The weight of any individual company included in the Index is capped at 5%. Weight above the 5% limitation is redistributed among the other Index constituents in proportion to their weights. As of February 28, 2023, the companies included in the Index had a market capitalization of \$304 million to \$5.97 billion. As of February 28, 2023, the Index had significant exposure to the health care and information technology sectors. The Index is reconstituted and rebalanced quarterly as of the close of business on the third Friday of March, June, September, and December based on data as of the first Friday of the applicable rebalance month.

The Fund’s Investment Strategy

Under normal circumstances, the Fund will seek to invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in securities of small-capitalization companies (“small cap”) that are principally traded in the United States. The Adviser expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it will invest in all of the component securities of the Index in the same approximate proportion as in the Index.

The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks summarized below. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund’s prospectus entitled “Additional Information about the Principal Risks of Investing in the Fund.” The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

- **Calculation Methodology Risk.** The Index relies directly or indirectly on various sources of information to assess the criteria of issuers included in the Index, including information that may be based on assumptions and estimates. Neither the Fund, the Index Provider, or the Adviser (as defined below) can offer assurances that the Index’s calculation methodology or sources of information will provide an accurate assessment of included issuers or a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

- **Concentration Risk.** If the Index concentrates in an industry or group of industries, the Fund’s investments may be concentrated accordingly. In such event, the value of the Fund’s shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries. In addition, at times, an industry or group of industries in which the Fund is concentrated may be out of favor and underperform other industries or groups of industries.
- **Equity Market Risk.** The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Fund invests. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- **ETF Risks.** The Fund is an ETF and, as a result of an ETF’s structure, is exposed to the following risks:
 - *Authorized Participants (“APs”), Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, shares of the Fund may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares of the Fund.* Due to the costs of buying or selling shares of the Fund, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of shares of the Fund may significantly reduce investment results and an investment in shares of the Fund may not be advisable for investors who anticipate regularly making small investments.
 - *Shares of the Fund May Trade at Prices Other Than NAV.* As with all ETFs, shares of the Fund may be bought and sold in the secondary market at market prices. The price of shares of the Fund, like the price of all traded securities, will be subject to factors such as supply and demand, as well as the current value of the Fund’s portfolio holdings. Although it is expected that the market price of the shares of the Fund will approximate the Fund’s NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for shares in the secondary market, in which case such premiums or discounts may be significant.
 - *Trading.* Although shares of the Fund are listed for trading on a national securities exchange, such as the Nasdaq Stock Market LLC (the “Exchange”), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that shares of the Fund will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of shares of the Fund may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than shares of the Fund, and this could lead to differences between the market price of the shares of the Fund and the underlying value of those shares.
- **Growth Stock Risk.** The stocks of growth companies can be more sensitive to the company’s earnings and more volatile than the market in general.
- **New Fund Risk.** The Fund is new with no operating history. As a result, there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case it may experience greater tracking error to its Index than it otherwise would at higher asset levels, or it could ultimately liquidate. The Fund’s distributor does not maintain a secondary market in Fund shares.
- **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund’s performance.

- **Passive Investment Risk.** The Fund is not actively managed and the Adviser would not sell a security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a reconstitution of the Index in accordance with the Index methodology. The Fund invests in securities included in the Index, regardless of their investment merits. The Fund does not take defensive positions under any market conditions, including conditions that are adverse to the performance of the Fund.
- **Sector Risk.** To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors.
 - *Health Care Sector Risk.* Companies in the health care sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines and an increased emphasis on the delivery of healthcare through outpatient services.
 - *Information Technology Sector Risk.* Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability.
- **Small-Capitalization Companies Risk.** The equity securities of small-capitalization companies have historically been subject to greater investment risk than securities of larger companies. The prices of equity securities of small-capitalization companies tend to be more volatile and less liquid than the prices of equity securities of larger companies.
- **Tracking Risk.** The Fund's return may not track the return of the Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. In addition, when the Fund uses a representative sampling approach, the Fund may not be as well correlated with the return of the Index as when the Fund purchases all of the securities in the Index in the proportions in which they are represented in the Index.

Fund Performance

Performance information for the Fund is not included because the Fund did not commence operations prior to the date of this Prospectus. In the future, performance for the Fund will be presented in this section. Updated performance information will be available on the Fund's website at www.PacerETFs.com or by calling the Fund toll-free at 1-877-337-0500.

Management

Investment Adviser

Pacer Advisors, Inc. (the "Adviser") serves as investment adviser to the Fund.

Portfolio Managers

Bruce Kavanaugh, Vice President of the Adviser, and Danke Wang, CFA, Portfolio Manager for the Adviser, are jointly and primarily responsible for the day-to-day management of the Fund and have served as portfolio managers since the Fund's inception.

Buying and Selling Fund Shares

The Fund is an ETF. This means that individual Shares of the Fund may only be purchased and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund generally issues and redeems shares at NAV only in large blocks of shares known as “Creation Units,” which only institutions or large investors may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash that the Fund specifies each day.

Investors may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information about the Fund, including its net asset value, market price, premiums and discounts, and bid-ask spreads is available on the Fund’s website at www.PacerETFs.com.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged retirement account. Distributions may be taxable upon withdrawal from tax-deferred accounts.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker or other financial intermediary (such as a bank), the Adviser and its related companies may pay the intermediary for activities related to the marketing and promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Additional Information About the Fund’s Investment Objective

The Fund’s investment objective has been adopted as a non-fundamental investment policy and may be changed without a vote of shareholders upon written notice to shareholders.

Additional Information About the Fund’s Principal Investment Strategies

The Fund will concentrate its investments (*i.e.*, hold 25% or more of its total assets) in a particular industry or group of related industries to approximately the same extent that the Fund’s Index is concentrated. For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities) are not considered to be issued by members of any industry. The components of the Fund’s Index, and the degree to which these components represent certain industries, may change over time.

Additional Information About the Index

The Pacer US Small Cap Cash Cows Growth Leaders Index is owned by Index Design Group (“IDG”), an affiliate of the Adviser, and is calculated by a third-party calculation agent that is not affiliated with the Fund, IDG, the Adviser or the Fund’s distributor.

S&P SmallCap 600[®] Index. The S&P SmallCap 600 measures the performance of approximately 600 small-size companies in the United States. As of February 28, 2023, the average market capitalization of companies in the S&P SmallCap 600 was \$1.7 billion.

Additional Information About the Principal Risks of Investing in the Fund

This section provides additional information regarding the principal risks described under “Principal Risks of Investing in the Fund” of the Fund Summary. Each risk summarized below is considered a ‘principal risk’ of investing in the Fund, regardless of the order in which they appear. The principal risks are presented in alphabetical order to facilitate finding particular risks. Each of the factors below could have a negative impact on the Fund’s performance and trading prices.

Calculation Methodology Risk

The Fund seeks to track the performance of the Index and therefore is subject to calculation methodology risk. The Index relies directly or indirectly on various sources of information to assess the criteria of issuers included in the Index, including information that may be based on assumptions and estimates. Neither the Fund, the Index Provider, or the Adviser can offer assurances that the Index’s calculation methodology or sources of information will provide an accurate assessment of included issuers or a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Concentration Risk

Concentration of investments may increase the risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, to the extent that the Fund’s investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. In addition, at times, an industry or group of industries in which the Fund is concentrated may be out of favor and underperform other industries or groups of industries.

Equity Market Risk

Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including, among others: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, public health, cyber, economic and banking crises. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer because common stockholders, or holders of equivalent interests, generally have inferior rights to receive payments from issuers in comparison with the

rights of preferred stockholders, bondholders, and other creditors of such issuers. Other conditions affecting the general economy, including political, public health, cyber, or economic instability at the local, regional, or global level and pandemics, epidemics, or other similar circumstances in one or more countries or regions may also affect the market value of a security.

The investments held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. U.S. and international markets have experienced volatility in recent months and years due to a number of economic, political and global macro factors, including rising inflation, the war between Russia and Ukraine, and the impact of the novel coronavirus (COVID-19) global pandemic. While U.S. and global economies are recovering from the effects of the pandemic, the recovery is proceeding at slower than expected rates and may last for a prolonged period of time. Uncertainties regarding interest rates, political events, the Russia-Ukraine war, rising government debt in the U.S., and trade tensions have also contributed to market volatility. Such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Such events could adversely affect the prices and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions in the trading markets. The trading prices of debt securities and other instruments may also fluctuate in response to a variety of other factors, and consequently, the Fund's NAV and market price may also fluctuate significantly. As a result, an investor could lose money over short or long periods of time.

ETF Risks

The Fund is an ETF and, as a result of an ETF's structure, is exposed to the following risks:

- *APs, Market Makers, and Liquidity Providers Concentration Risk.* The Fund may have a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares of the Fund may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares of the Fund May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Certain securities held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, and the Fund may experience premiums and discounts greater than those of ETFs that hold securities that are traded only in the United States.
- *Trading.* Although Shares are listed for trading on the Nasdaq Stock Market LLC and may be listed or traded on U.S. and non-U.S. stock exchanges other than its applicable Exchange, there can be no assurance that an active

trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of its applicable Exchange, make trading in Shares inadvisable. In addition, trading in Shares on its applicable Exchange is subject to trading halts caused by extraordinary market volatility pursuant to each Exchange's "circuit breaker" rules, which temporarily halt trading on such Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to each Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.

Growth Stock Risk

The stocks of growth companies can be more sensitive to the company's earnings and more volatile than the market in general.

New Fund Risk

The Fund has not yet commenced investment operations. As a result, prospective investors have no track record or history on which to base their investment decisions. An investment in the Fund may therefore involve greater uncertainty than an investment in a fund with an established record of performance. In addition, there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case it may experience greater tracking error to its Index than it otherwise would at higher asset levels, or it could ultimately liquidate. The Fund's distributor does not maintain an active market in Fund Shares.

Non-Diversification Risk

Although the Fund intends to invest in a variety of securities and instruments, the Fund is considered to be non-diversified. This means that the Fund may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

Passive Investment Risk

The Fund is not actively managed and the Adviser would not sell a security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a reconstitution of the Index in accordance with the Index methodology. The Fund invests in securities included in the Index regardless of their investment merits. Other than in response to one of the triggers set forth above in accordance with the Index methodology, the Fund does not take defensive positions under any market conditions, including conditions that are adverse to the performance of the Fund.

Sector Risk

To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors.

- *Health Care Sector Risk.* The Fund may invest in companies in the health care sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. Companies in the health care sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines and an increased emphasis on the delivery of healthcare through outpatient services. Companies in the health care sector are heavily dependent on obtaining and defending patents, which may be time consuming and costly, and the expiration of patents may also adversely affect the profitability of these companies. Health care companies are also subject to extensive litigation based on product liability and similar claims. In addition, their products can become obsolete due to industry innovation, changes in technologies or other market developments. Many new products in the health care sector require significant research and development and may be subject to regulatory approvals, all of which may be time consuming and costly with no guarantee that any product will come to market.

- *Information Technology Sector Risk.* The Fund may invest in companies in the information technology sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability. Additionally, companies in the information technology sector may face dramatic and often unpredictable changes in growth rates and competition for the services of qualified personnel.

Small-Capitalization Investing Risk

The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, public health, cyber or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

Tracking Risk

The Fund and its Index may vary somewhat for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by its Index. In addition, the Fund may not be fully invested in the securities of its Index at all times or may hold securities not included in its Index. The use of sampling techniques may affect the Fund's ability to achieve close correlation with its Index. The Fund may use a representative sampling strategy to achieve its investment objective, if the Adviser believes it is in the best interest of the Fund, which generally can be expected to produce a greater non-correlation risk.

ADDITIONAL NON-PRINCIPAL INVESTMENT STRATEGY INFORMATION

The Fund will generally use a "replication" strategy to achieve its investment objective, meaning it will invest in all of the component securities of the Index in the same approximate proportion as in the Index, but may, when the Adviser believes it is in the best interests of the Fund, use a "representative sampling" strategy, meaning it may invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole (*e.g.*, when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund may invest up to 20% of its assets in cash and cash equivalents, other investment companies, as well as securities and other instruments not included in the Index but which the Adviser believes will help the Fund track the Index.

ADDITIONAL NON-PRINCIPAL RISK INFORMATION

Cash Equivalents and Short-Term Investments. Normally, the Fund invests substantially all of its assets to meet its investment objective. The Fund may invest the remainder of its assets in securities with maturities of less than one year or cash equivalents, or each may hold cash. The percentage of the Fund invested in such holdings varies and depends on several factors, including market conditions. For more information on eligible short-term investments, see the SAI.

Absence of a Prior Active Market. Although the Fund's Shares are approved for listing on the a national securities exchange, there can be no assurance that an active trading market will develop and be maintained for Fund Shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience greater tracking error to its Index than it otherwise would at higher asset levels or the Fund may ultimately liquidate.

Liquidity Risk. The Fund may hold certain investments that may be subject to restrictions on resale, trade over-the-counter or in limited volume, or lack an active trading market. Accordingly, the Fund may not be able to sell or close out of such investments at favorable times or prices (or at all), or at prices approximating those at which the Fund currently values them. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value.

Risk of Investing in the United States. Certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure. A decrease in imports or exports, changes in trade regulations, and/or an economic recession in the United States may have a material adverse effect on the U.S. economy and the securities listed on U.S. exchanges. Proposed and adopted policy and legislative changes in the United States are changing many aspects of financial and other regulation and may have a significant effect on the U.S. markets generally, as well as on the value of certain securities. In addition, a continued rise in the U.S. public debt level or the imposition of U.S. austerity measures may adversely affect U.S. economic growth and the securities to which the Fund has exposure. The United States has developed increasingly strained relations with a number of foreign countries. If relations with certain countries continue to worsen, it could adversely affect U.S. issuers as well as non-U.S. issuers that rely on the United States for trade. The United States has also experienced increased internal unrest and discord. If this trend were to continue, it may have an adverse impact on the U.S. economy and the issuers in which the Fund invests.

Securities Lending Risk. There are certain risks associated with securities lending, including the risk that the borrower may fail to return the securities on a timely basis or even the loss of rights in the collateral deposited by the borrower, if the borrower should fail financially. As a result, the Fund may lose money. The Fund could also lose money in the event of a decline in the value of collateral provided for loaned securities or a decline in the value of any investments made with cash collateral. These events could also trigger adverse tax consequences for the Fund.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund's daily portfolio holdings is available at www.PacerETFs.com. A summarized description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

MANAGEMENT

The Fund is a series of Pacer Funds Trust (the "Trust"), a Delaware statutory trust, which is overseen by a board of trustees.

Investment Adviser

The Adviser has overall responsibility for the general management and administration of the Trust and each of its separate investment portfolios. The Adviser is a registered investment adviser with offices located at 500 Chesterfield Parkway, Malvern, Pennsylvania 19355. The Adviser has managed ETFs since 2015. The Adviser also arranges for transfer agency, custody, fund administration, securities lending and all other related services necessary for the Fund to operate.

For its services, the Adviser receives a fee from the Fund, based on 0.59% of the Fund's average daily net assets.

Under the Investment Advisory Agreement between the Adviser and the Trust, on behalf of the Fund (the "Investment Advisory Agreement"), the Adviser has agreed to pay all expenses of the Fund, except for: the fee paid to the Adviser pursuant to the Investment Advisory Agreement, interest charges on any borrowings, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution (12b-1) fees and expenses.

The basis for the Board of Trustees' approval of the Fund's Investment Advisory Agreement will be available in the Fund's first Annual or Semi-Annual Report to Shareholders.

Portfolio Managers

The Fund employs a rules-based, passive investment strategy. The Adviser uses a committee approach to managing the Fund. The Fund's portfolio management team consists of Bruce Kavanaugh and Danke Wang, who are jointly and primarily responsible for the day-to-day management of the Fund's portfolio.

Mr. Kavanaugh has been Vice President of the Adviser since it began operations in 2004. He has been a portfolio manager with the Adviser since 2013. Mr. Kavanaugh has more than 25 years of experience in financial services.

Mr. Wang, Head Portfolio Analyst and Portfolio Manager, joined the Adviser in 2014. He served as a Senior Portfolio Analyst of the Adviser from 2014 to 2022, and became Head Portfolio Analyst in 2022.

The SAI provides additional information about each Portfolio Manager's compensation structure, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of Shares of the Fund.

ADDITIONAL INFORMATION ON BUYING AND SELLING FUND SHARES

Most investors will buy and sell Shares of the Fund through brokers. Shares of the Fund trade on the applicable exchange as listed on the cover of this Prospectus (each, the applicable "Exchange") and elsewhere during the trading day and can be bought and sold throughout the trading day like other shares of publicly traded securities. When buying or selling Shares through a broker, most investors will incur customary brokerage commissions and charges. Shares of the Fund trade under the trading symbol listed on the cover of this Prospectus. Only authorized participants ("Authorized Participants" or "APs") who have entered into agreements with the Fund's distributor may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV in Creation Units. Once created, Shares trade in the secondary market in amounts less than a Creation Unit.

Share Trading Prices

Transactions in the Fund's Shares will be priced at NAV only if you purchase Shares directly from the Fund in Creation Units. As with other types of securities, the trading prices of Shares in the secondary market can be affected by market forces such as supply and demand, economic conditions and other factors. The price you pay or receive when you buy or sell your Shares in the secondary market may be more or less than the NAV of such Shares.

Determination of Net Asset Value

The NAV of the Fund's Shares is calculated each day the New York Stock Exchange ("NYSE") is open for trading as of the close of regular trading on the NYSE, generally 4:00 p.m. Eastern Time (the "NAV Calculation Time"). If the NYSE closes before 4:00 p.m. Eastern Time, as it occasionally does, the NAV Calculation Time will be the time the NYSE closes. In addition, any U.S. fixed-income assets may be valued as of the announced closing time of trading in fixed income instruments on any day that the Securities Industry and Financial Markets Association announces an early closing time. The Fund's NAV per share is calculated by dividing the Fund's net assets by the number of Fund Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. Debt obligations with maturities of 60 days or less are valued at amortized cost.

Fair Value Pricing

The Adviser has been designated by the Board as the valuation designee for the Fund pursuant to Rule 2a-5 under the 1940 Act. In its capacity as valuation designee, the Adviser has adopted procedures and methodologies to fair value Fund securities whose market prices are not "readily available" or are deemed to be unreliable. For example, such circumstances may arise when: (i) a security has been de-listed or has had its trading halted or suspended; (ii) a security's primary pricing source is unable or unwilling to provide a price; (iii) a security's primary trading market is closed during regular market hours; or (iv) a security's value is materially affected by events occurring after the close of the security's primary trading market. Generally, when fair valuing a security held by the Fund, the Adviser will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies established by the Adviser and approved by the Board. Due to the subjective and variable nature of determining the fair value of a security or other investment, there can be no assurance that the Adviser's fair value will match or closely correlate to any market quotation that subsequently becomes available or the price quoted or published by other sources. In addition, the Fund may not be able to obtain the fair value assigned to the security upon the sale of such security.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Dividends and Distributions

The Fund expects to pay out dividends, if any, on a quarterly basis. Nonetheless, the Fund may make more frequent dividend payments. The Fund expects to distribute its net realized capital gains to investors annually. The Fund occasionally may be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Book Entry

Shares of the Fund are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares of the Fund.

Investors owning Shares of the Fund are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares of the Fund. Participants include DTC, securities brokers and dealers, banks, trust companies, clearing corporations, and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any securities that you hold in book-entry or “street name” form. Your broker will provide you with account statements, confirmations of your purchases and sales, and tax information.

Delivery of Shareholder Documents – Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of the prospectus and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

Frequent Purchases and Redemptions of Fund Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Fund Shares. In determining not to impose such restrictions, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Fund Share trading prices in line with NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effective trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in Rule 12d1-4 under the 1940 Act, including that such investment companies enter into an agreement with the Fund.

ADDITIONAL TAX INFORMATION

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a registered investment company (“RIC”). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum

distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund Shares is made through a tax advantaged retirement account, such as an IRA, you need to be aware of the possible tax consequences when:

- The Fund makes distributions;
- You sell Fund Shares; and
- You purchase or redeem Creation Units (institutional investors only).

Taxes on Distributions

Tax reform legislation commonly known as the Tax Cuts and Jobs Act (the “Tax Act”) was enacted on December 22, 2017. The Tax Act made significant changes to the U.S. federal income tax rules for individuals and corporations, generally effective for taxable years beginning after December 31, 2017. The application of certain provisions of the Tax Act is uncertain, and the changes in the act may have indirect effects on the Fund, its investments and its shareholders that cannot be predicted. For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or “qualified dividend income.” Taxes on distributions of capital gains (if any) depend on how long the Fund owned the assets that generated them, rather than how long a shareholder has owned his or her Fund Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund’s net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are properly reported by the Fund as capital gain dividends (“Capital Gain Dividends”) are taxable as long-term capital gains. For noncorporate shareholders, long-term capital gains are generally subject to tax at reduced rates and currently set at a maximum rate of 20%. Distributions of short-term capital gain are generally taxable as ordinary income. Distributions of investment income reported by the Fund as derived from “qualified dividend income” will be taxed at long term capital gain rates for non-corporate shareholders.

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% Medicare contribution tax on all or a portion of their “net investment income,” which includes interest, dividends, and certain capital gains (generally including capital gain distributions and capital gains realized on the sale or exchange of Fund Shares).

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Fund Shares’ NAV when you purchased your Fund Shares).

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Nonresident aliens, foreign corporations and other foreign shareholders in the Fund will generally be exempt from U.S. federal income tax on Capital Gain Dividends. The exemption may not apply, however, if the investment in the Fund is connected to a trade or business for the foreign shareholder in the United States or if the foreign shareholder is present in the United States for 183 days or more in a year and certain other conditions are met.

Distributions (other than Capital Gain Dividends) paid to individual shareholders that are neither citizens nor residents of the U.S. or to foreign entities will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of Shares of the Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year.

The Fund (or a financial intermediary, such as a broker, through which shareholders own Fund Shares) generally is required to withhold and to remit to the US Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

A U.S. withholding tax at a 30% rate will be imposed on dividends effective July 1, 2014 (and proceeds of sales in respect of Fund Shares (including certain capital gain dividends) received by Fund shareholders beginning after December 31, 2018) for shareholders who own their Shares through foreign accounts or foreign intermediaries if certain disclosure requirements related to U.S. accounts or ownership are not satisfied. The Fund will not pay any additional amounts in respect to any amounts withheld.

To the extent the Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund received from sources in foreign countries. If more than 50% of the total assets of the Fund consists of foreign securities, such Fund will be eligible to elect to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. The Fund (or its administrative agent) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

Taxes When Fund Shares Are Sold

Any capital gain or loss realized upon a sale of Fund Shares is generally treated as a long-term gain or loss if the Shares have been held for more than one year. Any capital gain or loss realized upon a sale of Fund Shares held for one year or less is generally treated as a short-term gain or loss, except that any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent that Capital Gain Dividends were paid with respect to such Shares. The ability to deduct capital losses may be limited depending on your circumstances.

A foreign shareholder will generally not be subject to U.S. tax on gains realized on sales or exchange of Fund Shares unless the investment in the Fund is connected to a trade or business of the investor in the United States or if the shareholder is present in the United States for 183 days or more in a year and certain other conditions are met. All foreign shareholders should consult their own tax advisors regarding the tax consequences in their country of residence of an investment in the Fund.

Creation and Redemption Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the Shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses. Persons purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction.

The Fund has the right to reject an order for Creation Units if the purchaser (or group of purchasers) would, upon obtaining the Shares so ordered, own 80% or more of the outstanding Shares of the Fund and if, pursuant to section 351 of the Internal Revenue Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial Share ownership for purposes of the 80% determination.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment

in Shares under all applicable tax laws. For more information, please see the section entitled “Federal Income Taxes” in the SAI.

State and Local Taxes

Shareholders may also be subject to state and local taxes on income and gain attributable to your ownership of Fund Shares. State income taxes may not apply, however, to the portions of the Fund’s distributions, if any, that are attributable to interest earned by the Fund on U.S. government securities. You should consult your tax professional regarding the tax status of distributions in your state and locality.

DISTRIBUTION

The Distributor, Pacer Financial, Inc., is a broker-dealer registered with the U.S. Securities and Exchange Commission. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor’s principal address is 500 Chesterfield Parkway, Malvern, Pennsylvania, 19355. The Distributor is an affiliate of the Adviser.

The Board has adopted a Distribution and Service Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of the Fund’s assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares of the Fund traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund will be available in the future on the Fund’s website at www.PacerETFs.com.

ADDITIONAL NOTICES

The Fund is not sponsored, endorsed, sold or promoted by S&P Dow Jones Indices. S&P Dow Jones Indices does not make any representation or warranty, express or implied, to the owners of the Fund or any member of the public regarding the advisability of investing in securities generally or in an Index or the Fund particularly or the ability of an Index or the Fund to track general market performance. S&P Dow Jones Indices is not responsible for and has not participated in the creation of the Fund, the determination of the prices and amount of the Fund or the timing of the issuance or sale of the Fund or in the determination or calculation of the equation by which the Fund may be converted into cash or other redemption mechanics. S&P Dow Jones Indices has no obligation or liability in connection with the administration, marketing or trading of the Fund. There is no assurance that investment products based on an Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment adviser. Inclusion or exclusion of a security within an Index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it investment advice. S&P Dow Jones Indices does not act nor shall be deemed to be acting as a fiduciary in providing the Index.

NONE OF THE EXCHANGE, SPDJI OR THEIR THIRD PARTY LICENSORS GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS, OR COMPLETENESS OF THE S&P INDICES OR ANY DATA INCLUDED THEREIN OR ANY COMMUNICATIONS, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATIONS (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. NONE OF THE EXCHANGE, SPDJI OR THEIR THIRD PARTY LICENSORS SHALL BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. THE EXCHANGE AND SPDJI ENTITIES MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THEIR MARKS, THE S&P INDICES, OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL THE EXCHANGE, SPDJI ENTITIES, OR THEIR THIRD PARTY LICENSORS BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE.

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange makes no representation or warranty, express or implied, to the owners of Fund Shares or any member of the public regarding the ability of the Fund to track the total return performance of the Index or the ability of the Index identified herein to track the performance of its constituent securities. The Exchange is not responsible for, nor has it participated in, the determination of the compilation or the calculation of the Index, nor in the determination of the timing of, prices of, or quantities of Fund Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Fund Shares in connection with the administration, marketing, or trading of Fund Shares.

The Exchange does not guarantee the accuracy and/or the completeness of the Index or the data included therein. The Exchange makes no warranty, express or implied, as to results to be obtained by the Fund, owners of Fund Shares, or any other person or entity from the use of the Index or the data included therein. The Exchange makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Index or the data included therein. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Index Provider, the Exchange, and the Fund make no representation or warranty, express or implied, to the owners of Fund Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly. The Fund does not guarantee the accuracy, completeness, or performance of the Index or the data included therein and shall have no liability in connection with the Index or Index calculation. The Index Provider owns the Index and the Index methodology and is a licensor of the Index to the Adviser. The Index Calculation Agent maintains and calculates the Index for the Fund. The Index Calculation Agent shall have no liability for any errors or omissions in calculating the Index.
